

THE RESCUE SHEET : INSTRUCTION FOR USE

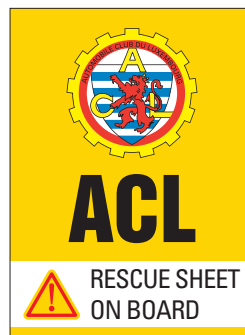

1. Select your vehicle according to model and body type. The relevant information is given in the certificate of conformity under point 0.2. In addition, it is important to check the year of manufacture of your vehicle (usually this information is on the first page under point 0.6, second date).
2. Print the ACL-Rescue Sheet **in colour**.
3. Attach the rescue Sheet behind the sun visor on the driver's side using the tab or a rubber band.

4. Collect the sticker (or have it sent to you) indicating that there is a rescue sheet in the vehicle from our branch in Bertrange. For this purpose, please bring the rescue sheet printed in color, your certificate of conformity and your motor vehicle registration certificate.
5. Attach the sticker to the bottom or top left of the windscreen (driver's side). Make sure that the sticker does not obstruct the driver's view!

Example of a Rescue Sheet:
